LIBERTY'S SENSATIONAL PORTABLE, AUTOMATIC RADIO and PHONOGRAPH COMBINATION

AUTOMATIC FEATURES

It is a revolutionary type of portable that will play eight records consecutively. This is accomplished by means of a record-changer, which works like the human hand. After a record has been played, it automatically places it in a specially designed tray. When the tray is closed it holds records on the turn-table in position for carrying.*

ALTERNATING AND DIRECT CURRENT

It is equipped for operation on either alternating or direct current and can also be had for the higher voltages of Europe. The radio is the latest six-tube superheterodyne, unexcelled for regular broadcasts as well as for short waves for Europe. Extra large dynamic speaker which gives this instrument exceptional tone.

While playing the phonograph, the lid can be closed.

In a smart, attractive, genuine cowhide leather case, specially designed.†

*Patents for design and operation of record tray applied for.

†Patents for design of case and other features applied for.

You may view this marvellous instrument at Miss Marta Linder-skold's, Meetinghouse Lane and Lewis St., our Southampton representative.
